

## Adjustable Attic Insulation Shield

### ENGINEERED FOR SAFETY AND PERFORMANCE

The Adjustable Attic Insulation Shield (AAIS) by Amerivent is engineered for safety and performance—designed for use wherever a chimney passes through an open attic space. So, whether you're working with blown-in, batt, or blanket insulation, the AAIS protects nearby combustibles and keeps the insulation away from the chimney's exterior.

- Required wherever the chimney enters the attic space
- Maintains 2" clearance to combustibles
- Adjustable from 12" to 22" for flexible installation
- Drop-Down Shield protects the joist area
- Prevents insulation from entering framed opening or contacting the chimney

Adjustable Attic Insulation Shield Available Sizes							
DIA.	PART No.	MODEL No.	A	B	C	D	E
5"	802500	5TLCAAIS	7-3/16"	11-7/16"	9-1/4"	11"	13"
